

# JOEL NICOLAS MORAN

Full Stack Developer

(+54) 11 25442653 - Garín, Buenos Aires - joel.programador@hotmail.com  
joelmoran.com.ar - linkedin.com/in/joel-moran - github.com/ChiqoGamer

Full Stack Developer with training from UTN (FRGP) and experience in web application development using React and JavaScript for frontend, and C#/Java for backend. I have worked on real projects implementing REST APIs, database management, and responsive design. Currently focused on improving user experience (UX/UI) and backend development with Node.js.

## EXPERIENCE

---

### Developer - Colidevs

Aug 2024-Present

- Developed the company's landing page using Astro and Tailwind CSS, optimizing performance, responsive design, and SEO positioning.
- Work in a team environment focused on the development of scalable digital products.

### Teaching Assistant - Programming I (UTN FRGP)

Aug 2023-Present

- Collaborated in theoretical and practical classes, assisted students, and graded assessments.
- Provided guidance in understanding programming logic and solving practical problems.

### React Front-End Developer (Ecommerce with Product Management)

2025

- Developed an ecommerce application with React, integrating REST API (MockAPI) and a login system for product management (CRUD).
- Implemented multiple views (catalog, detail, and checkout) for a dynamic user experience. Project deployed on Vercel.

### Private C++ Programming Tutor

Apr 2024-Present

- Provide personalized classes to university students, focused on programming logic, flowcharts, and practical exercise resolution.
- Supporting their academic formation through consistent guidance.

## EDUCATION
